

# Protein Characterisation

# Protein Characterisation

## mosquito

Automated Liquid Handling

- High throughput nanolitre dispensing
- True positive displacement pipetting
- Genomics, crystallography, screening, assay development

ttp labtech

## UNcle

Stability and Aggregation Analysis

- $T_m$  &  $T_{agg}$ , isothermal stability, thermal recovery,  $B_{22}$  &  $k_D$
- Sizing, polydispersity & viscosity
- 48 samples at a time, 9  $\mu$ L of each

UNCHAINED LABS

## dragonfly

Automated Liquid Handling

- Reliable low volume, non-contact dispensing
- Rapid assay development, significant reagent & cost savings
- Broad dynamic range

ttp labtech

## Stunner

Only system to combine size & concentration

- Concentration analysis
- Hydrodynamic size
- Polydispersity & protein aggregation

UNCHAINED LABS

## Trap

Dynamic Protein Interaction

- Optical tweezers
- DNA-RNA-protein interactions
- Protein folding and conformation

LUMICKS  
Capture Molecular Interactions

## Lunatic

Batch Quantification of Protein, DNA & RNA

- Measure multiple 2 $\mu$ L samples at any concentration
- Samples stable in chip for up to 2hrs
- Actual concentration of DNA/RNA without impurities

UNCHAINED LABS

## XtaLAB Synergy

Structural Biology / Protein Crystallography

- 4 fold higher flux PhotonJet sources
- Dual Wavelength sources (Mo/Cu/Ag)
- Leading edge HPC Detectors

Rigaku  
oxford diffraction

## HUNKY

Quantifying protein stability using  $\Delta G$

- $C_{1/2}$
- $\Delta G$  and  $\Delta G_{trend}$
- Agg Path

UNCHAINED LABS

## Big Kahuna

Customisable Automated Biologics Formulation

- Automated buffer exchange in microplates
- Characterise formulations with limited material
- Developability and stability screens

UNCHAINED LABS

## pUNK

Protein Sizing Platform (DLS)

- Compact and fast
- Just 5 $\mu$ L sample (recoverable)
- Protein size, per cent aggregation & polydispersity

UNCHAINED LABS

● Target Identification & Validation | cloning & expression | assay development

● Lead Identification | assay development | activity analysis

● Characterisation & Optimisation | biophysical | chemical

● Safety & Preclinical | formulation | stability

● Manufacturing & Regulatory | scale up | optimisation

## hoUND

Automatic Contaminant Detection & Identification

- Particle size, count and shape: Microscopy
- Particle identification: Raman spectroscopy and/or LIBS
- Fully configurable to your requirements

UNCHAINED LABS
